Jazz guitarists are well aware that creating a **great jazz tone** requires not only the right guitar but also the **right amplifier**. The **DV Little Jazz** combo has been designed with a jazz guitar in mind. Lots of attractive features which make it a **new standard for jazz guitarists** and everyone in need of a **small, ultra-compact, very-portable** combo with a **clean, warm, powerful sound!**

SUGGESTED SELLING POINT

> Wide dynamic range, fast solid-state attack and a warm sound

The **DV Little Jazz** combo has a **warm, musical sound**. The amp's **innovative technology** gives you **faster attack** and **improved dynamic response**.

> Light weight and portability

This is one of the **most compact** and **lightweight** (only **14.55 lbs / 6.6 kg**) combo on the market, and it certainly has the most **volume** and **best sound** for its size! When you do a lot of gigs, weight and size are an issue. Now you can get **great tone** in a **very compact package**, with **best portability!**

> Simple and effective controls

Plug your guitar into this combo and start playing... you'll immediately hear the **sound quality**. The **simple** and **effective EQ controls** section give you lots of **tonal freedom** which allows you to easily find your own **jazz sound**.

> External speaker capability

The DV Little Jazz is able to connect to an **8 ohm extension cabinet**, giving you a **louder rig!**

> Warm, natural onboard reverb

This amp features a last generation of digital **reverb**, it's **sweet-sounding, warm and natural**.

> XLR output connection

Very useful for bigger gigs, the **XLR line out** allows you to run your guitar amp through the PA.

> Headphone out / Aux in

The amp section includes an **headphone output**, and an **aux input** for iPod or MP3 player. A **switch** on the rear panel turns **off the speaker** so you can practice anywhere and anytime you like, always with a **professional sound**.
