

# ECO-88S

## Sonata series dynamic microphone

### Description

The ECO-88S series of cardioid microphones are designed to meet the users' expectation on price. Besides their attractive appearance and sturdy construction, they provide features such as a wide frequency response and high sensitivity, which makes ECO-88S series perform well for sound reinforcement in karaoke entertainment, teaching lectures and general audio enhancement.

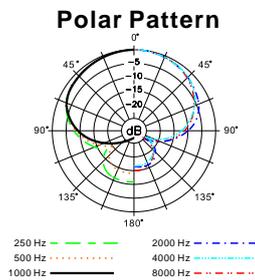

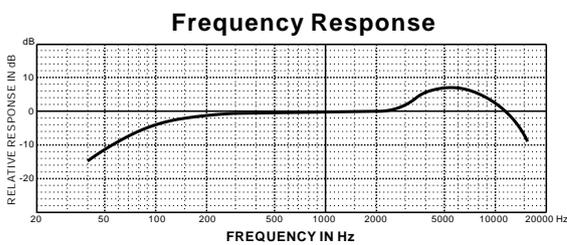

The two models differ only in cable option, ECO-88S has on/off switch without cable, ECO-88SC has on/off switch with cable.
